Standard Laptop Procurement Project

README.md

```
# Standard Laptop Procurement – Flow Automation

## Project
Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

## Purpose
This project represents the documented Standard Laptop procurement workflow
in code form for demonstration/testing.

## Workflow
1. A Standard Laptop request is submitted.
2. The request is checked for approval.
3. A Catalog Task is created.
4. The task short description is set to
   "Laptop need to Configured".
5. The task is assigned to the "Hardware" group.

## Run
npm start

## Configuration
The .env file contains the flow name, assignment group,
short description, and approval value.

## Note
The supplied project reference describes ServiceNow Flow Designer
configuration steps. This folder is a coding representation of that
workflow.
```
